Q1.

Delaware College Survey Project
Informed Consent and Confidentiality Statement

ADULT STUDENT AGREEMENT FOR PARTICIPATION IN THE PROJECT

We would like to invite you to participate in a research study on college student behaviors, attitudes, activities, and experiences. Student Wellness and Health Promotion, working with the Center for Drug and Heath Studies, has selected a random sample of undergraduate students at UD for this study. You have been selected as part of this sample.

We are interested in your views and experiences, as your perspective may be different from those of college administrators. This survey provides an opportunity for you to provide your input on various health and safety issues which affect our campus, such as drinking, drug use, gambling, personal victimization, relationships, and sexuality. Attention is also given to identifying the ways in which UD students avoid negative behavioral influences. Your responses may help with a review and possible revision of the University of Delaware's alcohol and other policies, and likely will help to identify promising practices which could make our campus a safer and healthier place for all.

Your participation throughout the survey is completely voluntary. There is no penalty if you choose not to fill out any part of the survey or all of it. However, your response is very important to us. All those who complete the survey will receive a $5 credit redeemable wherever UD1 Flex is accepted, including the Trabant Food Court, the University Bookstore, dining halls and several other campus stores and eateries.

Experience has shown that this Internet-based questionnaire usually takes about 10-15 minutes to complete. We hope that you will take this time to complete this Internet-based questionnaire.

Your responses will remain completely confidential. Your responses are immediately encrypted by the Qualtrics software program and not readable by others. We will not release any identifying information unless you authorize us to do so in writing.

The ID number in the web address will be used to link your data to you just long enough for us to ensure that no one else has responded in your place. It will also ensure that you will receive the $5 incentive. Once we receive the completed survey, your ID number will immediately be separated from the data used for analyses.
