While the most prominent impact of driving under the influence (DUI) is fatalities, fatalities occur in only 3.5% of DUI crashes. There are significant consequence associated with non-fatal DUls. The Delaware Office of Highway Safety notes large numbers of crashes involving injuries and property damage, and even when physical consequences are not a factor, there is the impact of the time and money involved in the police and courts processing 4,249 arrests for DUI in 2013.

DUI Arrests | DUI Crashes | DUI crashes w/property damage | DUI crashes w/injury | DUI crashes with fatalities
---|---|---|---|---
4249 | 1176 | 738 | 397 | 41
