## Delaware Public Schools More Likely to Report Student Drug Offenses than Alcohol

While Delaware public school students are more likely to report use of alcohol than they are use of drugs that may not be the case in a school context. Schools report charging students with three times as many drug offenses as alcohol (offenses required to be reported under Title 14, Delaware Code 4112). In addition, students may be charged with having drug paraphernalia (not shown in the chart below).
